THE LONG COLD WINTER IS COMING TO AN END

The worst of the economic decline is likely over, and there are starting to be signs of positive market conditions.

PAGE 5

Redundant Absolute Rotary Encoder

SIKO GmbH has developed the redundant absolute rotary encoder VW58MR.

- Measures angles and paths, even under the most extreme conditions
- Features Category 2 construction, allowing it to be used up to SIL2 and PID
- Based on robust magnetic scanning technology
- Measurement range of 4,096 revolutions (12-bit Multiturn) is broken into 16,384 steps (14-bit)
- Inclusion of strong double-ball bearings mean high axial and radial loads on the shaft
- Features specialized software to record slewing ring positions

Wide-Angle LED Work Lamps

Optronics International has expanded its Opti-Brite LED work lamp line with the introduction of five Opti-Brite Wide-Angle LED Work Lamps.

- Features slim profile and convex lens that produces 40% wider area of illumination
- Provides enhanced light ray that augments lateral visibility by almost half
- IP69K rating increases reliability and service life when subjected to severe environmental conditions or cleaning methods
- Using two lamps enables users to shine light on an area almost the equivalent of three standard LED work lamps
- Ultra-smooth polycarbonate lens surface resists dust adhesion
- Offers wide range of effective lumen outputs, capable of meeting the needs of various applications
- Constructed with durable, die-cast aluminum housing and comes with tough, stainless steel mounting bracket
- Accommodates both 12 and 24V electrical systems
- Includes reverse polarity protection, and most models are EMC R10 approved
